DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dittgen in view of Sundhar et al. Dittgen teaches all the limitations of claim 1 except a housing. Sundhar teaches a housing 100. It would have been obvious to one of ordinary skill in the art at the time the invention was made to put the sheet and products of Dittgen inside the housing of Sundhar in order to better preserve the freshness of the consumable products of Dittgen. Dittgen teaches consumable products (cigars), a sheet 1,2,3,4,5,6, where products are attached to either side of the sheet (each adjacent sheet holds a cigar), and the products would be configured in the housing of Sundhar so that a consumer could grasp them as claimed. Sundhar clearly teaches the limitations of claim 2. Dittgen clearly teaches the limitations of claim 11. Regarding claim 13, plural sheets 1,2,3,4,5,6 will be inside the housing. Claim 14 is taught in the same manner noted regarding claim 1 above.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dittgen as modified regarding claim 1, further in view of Official Notice. Dittgen as modified regarding claim 1 teaches all the limitations of claim 3 except a cutout in one of the

walls of the housing. Official Notice is taken that containers with cutouts in a wall are old obvious and well known in the packaging arts. Cigarette packs are just one example. It would have been obvious in view of Official Notice taken to one of ordinary skill in the art at the time the invention was made to put Dittgen's sheet and products into a housing with a cutout in a wall for the purpose of protecting the products and at the same time allowing for easy removal of the product.

Allowable Subject Matter

Claim 6 is allowed.

Claims 4-5, 7, 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Regarding the restriction requirement made final in paper No. 9, and the comments at the top of page 4, it is maintained that there would have been a serious burden on the Examiner had the restriction requirement(s) not been made. Regarding the remarks in the second paragraph on page 4, the Examiner appreciates the Applicant making clear for the record his interpretation of the word "attached." The rest of the remarks are directed to the old grounds of rejection.
